

PRELIMINARY PROGRAM

Friday, September 18, 2015

OPENING CEREMONY

Chairs: **Michael Stark**, Germany; **Tahar Benhidjeb**, Abu Dhabi; **Gian Carlo Di Renzo**, Italy

Welcome remarks

Keynote lecture: The Genetical Revolution - Stem cells: Clinical applications at last

Augustinus Bader, Germany

Conception, reproduction, immunity and transplant: Seminal role of the embryo-derived preimplantation factor (PIF)

Eytan Barnea, USA

Saturday, September 19, 2015

Session 1A

Part 1:

Anaesthesia in Endoscopy and Unusual Situations

Keynote lecture: PAIN OUT, an international project to improve perioperative pain management. Examples from obstetrics and gynaecology

Winfried Meissner, Germany

Anaesthesia for and analgesia after in-utero repair of meningomyelocele

Management of the unexpected failed intubation

Peter Biro, Switzerland

A new paradigm in medicine: the natural orifice surgery, its applications and bioethical implications

Luca Cucurachi, Italy

Discussion

Part 2:

Acute Situations in Surgery

Acute surgery in the elderly, is there a need for stratification?

Morten Bay-Nielsen, Denmark*

Svend Schulze, Denmark

Emergency cerclage

Avinoam Tzabari, Israel

The use of laser in acute care surgery, emergency and complication

Leonardo Longo, Italy

Legal and ethical aspects of emergent intervention of obstetrics and gynaecology

Oktay Kadayifci, Turkey

Complication management after endoscopic appendectomy

Albert Tuchmann, Austria

The fast track in ambulatory care unit enhanced recovery after surgery

Alain Benichou, France*

Michel Bodkier, France

Discussion

Session 1B

Cesarean Section in the 21st century - an international Dialogue

CESAREAN SECTION: an increasing concern and current approaches (philosophy)

Chairs:

Galina M. Savel'eva, Russia

Vladislav I. Krasnopolsky, Russia

Michael Stark, Germany

Moderator: **Ospan A. Mynbaev**, Russia

Cesarean delivery worldwide - too many - too few

Birgit Arabin, Germany

The evidence base Cesarean section of the 21st century

Michael Stark, Germany

Cesarean section - unsolved problems

Galina M. Savel'eva, Russia*

Elena Ya Karaganova, Russia

Consequences of surgical activity in current obstetrics

Vladislav I. Krasnopolsky, Russia*

Lidia S. Logutova, Russia

Svetlana N. Buyanova, Russia

Cesarean section: surgical technique

Michail I. Koval'ev, Russia*

Leonid S. Alexandrov, Russia

Andrei V. Murashko, Russia

Anatoly I. Ishchenko, Russia

Ospan A. Mynbaev, Russia

Cesarean section in women with high risk pregnancy: postpartum endometritis

Igor B. Manukhin, Russia*

Sergei V. Firichenko, Russia

Cesarean section in France after the introduction of the evidence based methods

Valery Fontaine, France

Vaginal birth after cesarean section: is the problem resolvable?

Tatiana I. Babenko, Russia*

Ospan A. Mynbaev, Russia

Valery V. Ryzhkov, Russia

Can rising CS rates be reduced?

P. Kaščák, Czech Republic*

R. Gajdošík, Czech Republic

M. Hlaváček, Czech Republic

PRELIMINARY PROGRAM

Saturday, September 19, 2015

Declarations on Cesarean section: standardization of the surgical technique.

The NESA declaration

Michael Stark and the NESA surgical technique standardization team

The Moscow declaration

Savel'eva GM, Krasnopol'sky VI, Logutova LS, Ishchenko AI, Manukhin IB, Mynbaev OA, Murashko AI, Babenko TI, Mynbaev OA, Ryzhkov VV, Aleksandrov LS, Karaganova EYa, Kovalev MI, Buyanova SN, Zuev VM.

Discussion

An issue of joint statements on standardization of Cesarean section technique in order to present the recommendations at the FIGO world congress 2015

Lunch Break

Session 3:
Training the Future Surgeons

Keynote lecture: The future surgeries and future surgeons
Camran Nezhat, USA

Valorization of Medical Research
Calin Tiu, Romania

Training in Emergency Obstetric Care using simulation in Burundi
Philippe Moreira, Senegal

Serious Games for Training in Laparoscopic Surgery
Calin Tiu, Romania

Pediatric foregut surgery
Oliver Münsterer, Germany

Innocent Obstetrics and Gynaecology and unfair accusations
Oktay Kadayifci, Turkey

Discussion

Adjourn

Sunday, September 20, 2015

Session 4:
Part 1:
Endoscopy and its complications

Keynote lecture: Carbon dioxide homeostasis during laparoscopic surgery
Ospan A. Mynbaev, Russia

How to keep your brain in case of laparoscopic complications
Antoine Watrelot, France

Adhesions your companion in endoscopic surgery: The Belgian consensus on adhesions prevention.
Bruno van Herendael, Belgium

Acute conditions are related with postsurgical adhesions
Ospan A. Mynbaev, Russia

Endoscopic suturing in emergency situations how, what needle, what thread?
Bruno van Herendael, Belgium

PRELIMINARY PROGRAM**Sunday, September 20, 2015**

What can endoscopic surgeons learn from mishaps

Liselotte Mettler, Germany

Computer simulations of CO2 in blood during laparoscopic surgery

Sergei Simakov, Russia*

Ospan A. Mynbaev, Russia

Discussion

Part 2:

Telesurgery – State of the Art

Robotic single site surgery: How far, how soon

Konstantinos M. Konstantinidis, Greece

A new European telesurgical system with force feedback: The Telelap Alf-x

Michael Stark, Germany

The first clinical results of the new European Telesurgical system: The Telelap Alf-x

Georgia Monterossi, Italy

Laparoscopic and robotic cytoreductive surgery for advanced ovarian cancer

Farr Nezhat, USA

Discussion

Coffee Break

Session 5:

Optimization of Surgical Outcome I

Keynote lecture: "SMAPPS" Medical Apps to change patient care and medicine

Paul Wetter, USA

Next generation sequencing, a game-changer in precision medicine

Ayala Lagziel, Israel

OR Safety, OR Ready

Paul Wetter, USA

Optimization of the perioperative setup in patients with acute abdominal surgical conditions

Line Toft Tengberg, Denmark

Standardizing hysteroscopic myomectomy: the intracapsular cold loop technique

Ivan Mazzon, Italy*

Alessandro Favilli, Italy

Sandro Gerli, Italy

Complementary and Preventive Medicine: Aspects of Phytochemicals (Phytonutrients) before and after Surgery. Scientific Data

Werner Seebauer, Germany

The impact of translational research on emergency procedures in gynaecology

Ospan A. Mynbaev, Russia*

Anatoly I. Ishchenko, Russia

Evaluation and Results of Surgical Quality Assessment In Swiss Hospitals

Roland Richter, Switzerland

Prevention and management of emergency gynaecological and obstetrical conditions which are related to assisted reproductive technologies

Marina Yu Eliseeva, Russia*

Leyla B. Kindarova, Russia

Artur K. Khachatryan, Russia

Ospan A. Mynbaev, Russia

Discussion

PRELIMINARY PROGRAM

Lunch Break

Sunday, September 20, 2015

Session 6: Optimization of Surgical Outcome II

Medical team training and safety in laparoscopy
Antoine Watrelot, France

Train the Trainer in Surgery
Calin Tiu, Romania

Sportsmen hernia
Doron Kopelman, Israel

Sportsman's Hernia. Laparoscopic Solution of The Problem
Konstantinos M. Konstantinidis, Greece

Laparoscopic scar hernia operations
Albert Tuchmann, Austria

Managing general surgery service in the era of technological revolution
Doron Kopelman, Israel

The physiology of dying, insight by measuring the decline in the microcirculation
Tom Schneider, The Netherlands

Discussion

Novelties in Oncology

Keynote Lecture: Addressing intramural heterogeneity causing low efficacy of biological drugs, using rational design of drug combinations
Izhak Haviv, Israel

Discrepancies between ESMO and NCCN guidelines in breast cancer.
George Zografos, Greece

Pregnancy and breast cancer
Flora Zagouri, Greece

Proteomics in breast cancer
Eleni Zografos, Greece

Minimal-invasive diagnosis and therapy of high grade cervical intraepithelial neoplasia
Achim Schneider, Germany

New insight in pathophysiology of Ovarian cancer: Role of Fallopian tube and endometriosis
Farr Nezhat, USA

Malignancy arising from endometriosis
Uwe Andreas Ulrich, Germany

Discussion

Coffee Break

PRELIMINARY PROGRAM

Session 7:
Endometriosis – The silent enemy

Keynote Lecture: Endometriosis and Ovarian Cancer, the linkage
Ceana Nezhat, USA

Investigating the common genetic basis of Endometriosis and Ovarian Cancer
Ariel Rinon, Israel

Surgical treatment of deep endometriosis: when and how?

Anatoly I. Ishchenko, Russia*

Yury V.Chushkov, Russia

Anton A. Ishchenko, Russia

Leonid S.Alexandrov, Russia

Surgical Management of endometriosis of bowel, bladder, diaphragm, lungs and liver
Camran Nezhat, USA

Minimally invasive management of complex gynaecological pathologies - Severe endometriosis, endometrioma and frozen pelvis
Cihat Ünlü, Turkey

Discussion

Adjourn
